

Plan of Study (4-year plans)

University of Northern Iowa's Plan of Study is a tool available to assist students in course planning toward graduating in 4 years (eight semesters). Each undergraduate major has a sample plan of study outlining how the major can be completed in 4 years. Students are encouraged to work with their academic advisor to make strategic academic decisions about which courses to take each semester. Each first degree undergraduate student, and admitted graduate student will also receive an online Academic Advisement Report after orientation to aid in tracking degree requirements.
